U.S. REPRESENTATIVE OFFERING

TWIN LANCE DISRUPTER

DUAL-BARREL DISRUPTER STAND · EOD ROBOTS &
FIRST RESPONDERS

The only stand on the market capable of holding two disrupters. Lightweight and portable, the CTS Twin Lance preloads two independent projectile choices for rapid, on-scene decisions. Its Recoil Absorbing System (RAS) detaches for mounting on most EOD robotic platforms.

Manufactured by CTS (Contre-Terrorisme et Sécurité), Pointe-Claire, Québec — 20+ years in EOD manufacturing, deployed in 55+ countries. WTF is CTS's authorized U.S. representative, coordinating market access, procurement, and commercial support for American agencies and units.

TECHNICAL SPECIFICATIONS

Dual-Disrupter Stand

Nom. Length	590 mm [23"]
Nom. Width	220 mm [8.7"]
Nom. Height	260 mm [10.2"]
Nom. Weight	13 kg [29 lbs]
Disrupter Capacity	2 (dual-barrel)
Aiming System	ZCAS, loaded & ready to fire

Vs. Single-Disrupter Stands

Weight Savings	≈40% lighter
Stands Required	1 (vs. 2 separate)

KEY FEATURES

- **Only UVIED-capable** twin-disrupter stand on the market.
- **Anti-topple design** stable under load, indoors or field.
- **Removable RAS** mounts most EOD robotic platforms.
- **Disrupters stay mounted** when collapsed — no re-rigging.
- **Compact, backpack-ready** despite two full disrupters.
- **One setup, one aim point** — no exposure placing the 2nd.

SIX TACTICAL LOADOUT COMBINATIONS

01

Rapid Decision

Preload different projectiles per barrel; fire the one matched to the target.

03

Doubled Effect

Same projectile, both barrels together — double volume on large targets.

05

Split Targeting

One barrel hits a critical component; the other disrupts the same target.

02

Robot Re-Engagement

On a RAS-equipped robot: re-aim and fire the 2nd barrel if the 1st needs backup.

04

Unknown Hardness

Frangible + Granular Water Shot together: one penetrates, the other disrupts.

06

Redundant Strike

Both barrels loaded with GWS — one on target, one for dispersion.
